

CargoWise ediEnterprise Among First 50 Software Applications in the World To Earn Windows Server 2008 and Windows Vista Certification

Sydney, Australia, June 18, 2008 — CargoWise™ edi, a leading provider of integrated international supply chain logistics management systems and a Microsoft Certified Gold Partner, today announced it has earned the Windows Server 2008™ and Windows Vista™ certification with its ediEnterprise software solution.

CargoWise's ediEnterprise software application, a highly modular enterprise-class system designed to automate and streamline the operations and management of engaged forwarding, customs brokerage, warehousing and international logistics systems, was among the first 50 software applications in the world to be certified for Windows Server 2008 and Windows Vista operating systems.

After exhaustive testing to verify it met the standards for Microsoft's powerful new server and operating system releases, ediEnterprise now displays the Windows Server 2008 and Windows Vista logos.

"CargoWise edi is an outstanding partner that continually leads the way in deployment of the latest Microsoft technologies and solutions," said Paul Voges, Director of Small and Medium Business Sales and Partner (SMS&P), Microsoft Australia. "Microsoft is thrilled that CargoWise edi is among the first in the world to be certified for both Windows Vista and Windows Server 2008."

The display of the Windows Server 2008 and Windows Vista logo on its packaging and promotional materials enables CargoWise edi to assure potential customers that ediEnterprise is compatible to run on Windows Server 2008 and Windows Vista under Vista's enhanced security model.

Richard White, CEO of CargoWise edi said, "Our customers want simple, powerful server tools and rich and deeply functional desktops that are low cost to maintain and do not require deep IT skills. These new Microsoft components are a huge leap forward for customers and this certification verifies CargoWise edi is at the leading edge of supply chain and logistics technology."

ABOUT CARGOWISE™ EDI

CargoWise edi provides solutions for forwarders, customs brokers and logistics service providers focused on supply chain execution capability in an integrated ERP-like globally capable system. It is a world-leading provider of low-cost, high-value software solutions and services for the freight forwarding, NVOCC, express courier, customs brokerage, contract warehouse, container freight station, ships agency, local cartage and other supply chain services.

Every day, 1,300 logistics service providers, consisting of 33,000 users in 45 countries, move goods through the global supply chain using CargoWise edi's flagship product ediEnterprise. CargoWise edi offers supply chain logistics management systems that provide full integration across all departments and functionality for domestic, regional and global customers. Headquartered in the U.S., Australia and now in the UK, the Company operates from 12 worldwide offices across the U.S., Europe and Asia.
