## ***DSV Goes Live with CargoWise™ ediEnterprise Platform***

*- DSV Air and Sea Division Rolls Out ediEnterprise In Canada; Will go Global -*

**Chicago, Illinois, USA, May 21, 2008** — CargoWise™ edi, a leading provider of integrated international supply chain logistics management systems, announced that DSV Air & Sea, the multinational freight forwarding division of DSV A/S, has fully implemented the CargoWise ediEnterprise solution in its Canadian operation, the first of several global installations.

CargoWise edi recently contracted with DSV Air and Sea Division to apply its ediEnterprise system, a highly modular enterprise-class system designed to automate and streamline the operations and management of engaged forwarding, customs brokerage, contract warehousing and international logistics systems. To meet the needs of DSV's Canadian operations, CargoWise edi also delivered additional accounting functionality and In-Bond documentation for Canadian customs required for DSV Canada. When completed, the full integration of its front and back office systems is scheduled to be global.

Jorgen Moeller, President of DSV Air & Sea said: "For several years, DSV has used the transportation management software ediEnterprise from CargoWise edi to support our Air/Sea business in various countries with appropriate installations operated by the individual countries. As a result of the positive experience with ediEnterprise and due to its excellent fit to DSV's business processes, we have recently selected ediEnterprise as the future corporate standard transportation management system for the global Air/Sea business.

"In a joint effort between DSV and CargoWise edi, the software has been customized and configured to fulfill the needs of all our customers. The software will be operated centrally by DSV in our central Group IT division based in Copenhagen, and will be rolled out to more than 50 countries. On May 1, DSV successfully began with Canada as the first country using the new corporate solution. DSV Canada is not only utilizing the core transportation management modules of ediEnterprise, but also deploys the financial modules to manage all our financial processes. DSV expects substantial productivity increases associated with the rollout of the new software as a result of a higher level of standardization, improved data quality, and improved functionality to support the DSV business processes."

Richard White, CEO of CargoWise edi, commented: "DSV, already a great customer of CargoWise edi, with more than 800 users in 14 countries throughout Asia, has rolled out ediEnterprise, our globally capable, integrated solution in its Canadian business units. When completed, DSV's ediEnterprise implementation will include as many as 2,000 or more DSV users over the next few years."
